

STEAMTURBINE MAINTENANCE

SHOCKED BY EXPENSIVE PARTS?

We have already equipped more than 650 turbines with reverse engineered parts. Want to know more about it?

energetic 

STEAMTURBINE MAINTENANCE
THE BEST OF BOTH WORLDS

* Energetic nv has no agreements or any relationship with any original equipment manufacturer

WHY YOU BENEFIT CHOOSING ENERGETIC?

- Budget friendly final project results, ideal partner to help you meet your financial targets.
- Very customer oriented, each project is specially adapted to each specific customer.
- Fast project turnaround and responsive when performing additional work and flexible scheduling.
- To keep your turbine available we offer technical, remote assistance from our back office experts. 24/7 call out service, on-site troubleshooting, vibration analysis, borescope inspections.
- No excessive spending on common and strategic spare parts.
- 360° service on turbine, gearbox, generator and related equipment
- Sharing technical information and drawings to build a database and to avoid parts becoming obsolete.

WHO IS ENERGETIC?

- Highly experienced own team who can perform the full job description working throughout Europe.
- We have a reputable customer base.
- Energetic is an established company with a vision to work safely that is documented, and a very comprehensive quality management system ISO 9001, working according to the ethical regulations of Europe.
- We have a new workshop fully equipped for steam turbine inspections & repairs inclusive a test bench for regulating and emergency stop valve testing.
- Repairs supported by engineering calculations, simulations, normalizations and experience. Using the same software tools as OEM's use.
- 3D modelling & 2D designing of production drawings for production of obsolete and regular parts. (more than 650 complete projects finished)
- Staff trained by various OEM's (ABB, MAN, Mitsubishi, GE, Siemens) *
